DIFFERENCES ON AGILE AND WATERFALL:

AGILE MODEL:

It adhere to the changes .It is flexible to the model.

*.Divides process into sprints.

*.Incremental approach.

*.It is like a collection of several different projects.

*.Allows making changes later on as well.

WATERFALL MODEL:

*.Divides process into phases.

*.Sequential approach.

*.It is rigid.

*.It does not allow changes in the later stages.

In both terms changed but phases are same.
